

LEADER LPG DISPENSING EXCELLENCE

The LEADER Dual/Single Auto LPG driveway flowmeter combines technical innovation, reliability and safety in a package that will enhance the driveway of any LPG filling station.

Based on reliable electronics with new features to support temperature and density compensated delivery of LPG

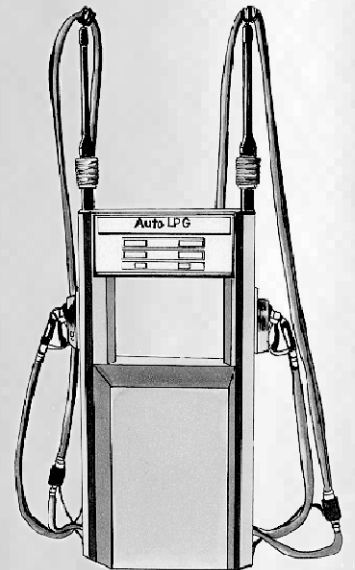

Super-responsive *electronic vapour elimination* improves reliability and simplifies hydraulics

Available in both single and dual configurations

Service your customers faster!
Our innovative hydraulic design provides for flowrates up to 60 l.p.m.

Simple design. Innovative engineering.
All at a very competitive price.

FURTHER INFORMATION

Large 25mm Money and Volume displays. ●
Efficient hydraulic design minimises filling time, allowing you ●
to serve customers faster. Depending on pumping ●
arrangement, flowrates of 60 l.p.m can be achieved

Product prices can be changed remotely. ●
Designed to communicate with a large range of ●
consoles and Point-Of-Sale terminals
Microprocessor control system provides advanced ●
diagnostics to aid troubleshooting
Secure, tamper-proof, non-resetable electromechanical ●
volume totalisers are standard equipment

The LPG metering system is based on reliable and very accurate ●
meters. Combined with temperature compensation, density ●
compensation and vapour elimination, superior LPG measurement ●
accuracy is achieved. All compensations are performed ●
electronically by the advanced microprocessor control system

Complete safety is assured with an emergency shut-down ●
system that provides full shutoff at each hose.
Approved under National Standards Commission ●
of Australia No. P10/1/11
Complies with Australian Standards AS2229 and ●
AS1596 as a Type A dispenser
Cabinet made from high-quality stainless steel with ●
lower panels of reinforced fibreglass

The technology employed in these dispensers was developed by ●
the founder of LPG Measurement Technology.
This technology is Patented and is now used under license by ●
other major manufacturers of LPG dispensers

Simple design. Innovative engineering.
All at a very competitive price.
